

# Aboubacar SYLLA

## Data Engineer / Full-Stack Developer

• <https://syllaaboubacar.github.io> • <https://github.com/syllaaboubacar> • <https://www.linkedin.com/in/sylla-aboubacar-ba033312b>

• aboubacar.sylla54@gmail.com • +32 484 755 406 • Liège, Belgique

### Technical Skills

#### Spoken language

• French (C1) • English (B1)

#### Frontend

• Oracle Forms • Oracle Report Builder  
• React.js • Next.js • TypeScript  
• Tailwind CSS • Shadcn/ui

#### Backend

• Java Sprint Boot • Oracle PL/SQL  
• API REST • API SOAP • PHP  
• Python

#### Tools

• SqlDeveloper • VS Code • IntelliJ  
• Maven • Git/GitHub • Docker  
• Postman • Figma

#### Database

• Oracle • PostgreSQL • MySQL  
• MongoDB • Cassandra

### Soft skills

- Leadership
- Communication
- Curiosity
- Teamwork
- Adaptability

### Methodologies

- Agile / Scrum
- CI / CD
- TDD
- Clean Code
- Pair Programming

### Profil

Full-stack and Data Engineer with 10 years of experience, blending high-performance web development, cloud pipeline engineering, and Oracle PL/SQL expertise. I thrive on orchestrating robust architectures where smooth interfaces, scalable processing, and bulletproof data reliability are one and the same.

### Professional Experience

#### Senior Application Developer

##### Blueone Management SA

Liege Airport, Belgium · Jun 2022 — Jun 2025

Full-stack developer for advanced software solutions and services for airlines and aircraft operators.

PL/SQL SQL Oracle Forms Oracle report builder Php Javascript OCI(Cloud)  
Bootstrap Web service (Saop, Rest) Postman Sql developer

#### Teaching Assistant and Ph.D. Candidate

##### University of Namur, Department of Computer Science

Namur, Belgium · Jul 2018 — Jun 2022

Instructor for hands-on courses in Python programming, databases, database engineering, and information systems evolution (Bachelor's and Master's programs). Researcher and Ph.D. candidate in the dynamic analysis and visualization of database program manipulation in hybrid systems.

Python SQL Java Database AspectJ Javascript PL/SQL MongoDB MySql  
DbMaria Postgre SprintBoot

#### Database Administrator & Head of Academic Administration

##### Ahmadou Dieng University, Registrar's Office

Conakry, Guinea · Jun 2013 — Oct 2016

Management and maintenance of the institutional database. Automation of registrations and coordination with the IT department.

Database SQL Db Admin

### Education

#### Master's Degree in Digital Content Engineering for Business (ICONE)

University of La Rochelle, France · 2017-2018

#### Master's Degree in Intelligent Systems and Multimedia (SIM)

Vietnam National University (VNU), Vietnam · 2016-2018

#### Bachelor's Degree in Computer Science

Gamal Abdel Nasser University of Conakry (UGANC), Guinea · 2009-2011

#### High School Diploma in Sciences — With Honors

Maferinyah High School · 2008

### Projects

#### My Portfolio

Personal portfolio website developed with Next.js, TypeScript and Tailwind CSS, Next-themes and Next-intl (i18n). Showcase of my projects, skills and experiences. Responsive design with subtle animations for a smooth user experience. This platform is available on both Desktop and mobile versions.

Next.js Tailwind CSS TypeScript next-intl Shadcn/ui React Next-themes

### Ticket Management System

Ticket management application for customer support. Backend Java Spring Boot with REST API, frontend React (Next.js) + TypeScript. Features: ticket creation/assignment, status tracking, email notifications.

Next.js   Tailwind CSS   TypeScript   next-intl   Shadcn/ui   Spring-boot   React   RTK-query  
Hibernate   Postgresql   Zod   React-hook-form   Git

### Dynamic analysis and visualization of interactions between databases and programs in hybrid systems

Development of an analysis and comprehension tool for database manipulation logic behaviors within an information system.

Study of the historical evolution of software systems at given times t-1 and t by capturing SQL and NoSQL traces.

Java   Python   Sprint Boot   AspectJ   JavaScript   MongoDB   SQL   Antr   NoSql

### Development of visualization tools for genomic data analysis

Developing a data extraction, cleaning, and transformation platform for visual analysis purposes, similar to tools like Sniply.

Technologies used: Python, Flask, JQuery, Javascript, 3D.js, HighCharts.

Python   Flask   JQuery   Javascript   3D.js   HighCharts   Java   Sprint Boot
