

Aboubacar SYLLA

Data Engineer / Full-Stack Developer

• [Portfolio](#) • [GitHub](#) • [LinkedIn](#)

• aboubacar.sylla54@gmail.com • +32 484 755 406 • Liège, Belgique

Technical Skills

Spoken language

• French (C1) • English (B1)

Frontend

• Oracle Forms • Oracle Report Builder
• React.js • Next.js • TypeScript
• Tailwind CSS • Shadcn/ui

Backend

• Java Sprint Boot • Oracle PL/SQL
• API REST • API SOAP • PHP • Python

Tools

• SqlDeveloper • VS Code • IntelliJ
• Maven • Git/GitHub • Docker • Postman
• Figma

Database

• Oracle • PostgreSQL • MySQL
• MongoDB • Cassandra

Soft skills & Methodologies

- Leadership
- Communication
- Curiosity
- Teamwork
- Adaptability
- Agile / Scrum
- CI / CD
- TDD
- Clean Code
- Pair Programming

Profil

Full-stack & database engineer with 10 years of experience, bridging Oracle PL/SQL mastery with active tech watch (React, Typescript, Next.js, Java Spring Boot, cloud). Curious and inventive, I turn complex requirements into elegant solutions. My teaching experience enhances my ability to explain clearly and unite cross-functional teams.

Professional Experience

Senior Application Developer

Blueone Management SA

Liege Airport, Belgium · Jun 2022 — Jun 2025

Full-stacl and Oracle PL/SQL developer for airline software. Designs REST/SOAP APIs, manages OCI cloud infrastructure, develops mobile apps, and optimizes databases. Creates custom reports, oversees Linux/Windows systems, and handles proactive incident management and technical support.Implementation of ETL pipelines for data analysis using Power BI.

PL/SQL SQL Oracle Forms Oracle report builder Php Javascript OCI(Cloud) Bootstrap Web service (Saop, Rest)
Postman Sql developer

Teaching Assistant and Ph.D. Candidate

University of Namur, Department of Computer Science

Namur, Belgium · Jul 2018 — Jun 2022

Teaching assistant and researcher in computer science. Led practicals in Python, databases, and information system evolution. Researched dynamic analysis and visualization of SQL/NoSQL interactions. Served on the Faculty Council and represented the university at programming Olympiads.Database schema design and data modeling. Development of complex Oracle objects (procedures, packages, triggers, pipelines). Advanced functional analysis and SQL data manipulation.

Python SQL Java Database AspectJ Javascript PL/SQL MongoDB MySQL DbMaria Postgre SprintBoot

Database Administrator & Head of Academic Administration

Ahmadou Dieng University, Registrar's Office

Conakry, Guinea · Jun 2013 — Oct 2016

Database administrator and head of academic registration. Managed institutional databases, automated student enrollment processes, and coordinated with the IT department. Ensured data integrity, performance, and reliability across academic systems.

Database SQL Db Admin

Education

Master's Degree in Digital Content Engineering for Business (ICONE)

University of La Rochelle, France · 2017-2018

Master's Degree in Intelligent Systems and Multimedia (SIM)

Vietnam National University (VNU), Vietnam · 2016-2018

Bachelor's Degree in Computer Science

Gamal Abdel Nasser University of Conakry (UGANC), Guinea · 2009-2011

High School Diploma in Sciences — With Honors

Maferinyah High School · 2008

Projects

My Portfolio

Creation of a clean, multilingual and ergonomic online space aimed at showcasing my creative universe and professional achievements. The site offers intuitive navigation with a fully responsive design (mobile/desktop) and a customizable light/dark theme system for optimal reading comfort. • [Demo](#)

Next.js Tailwind CSS TypeScript next-intl Shadcn/ui React Next-themes

Ticket Management System

Design of a comprehensive ticket management application optimized for customer support. The platform enables rapid ticket creation and assignment, with granular tracking organized by categories (support, incidents, projects, and change requests). • [Demo](#)

Next.js Tailwind CSS TypeScript next-intl Shadcn/ui Spring-boot React RTK-query Hibernate Postgresql Zod
React-hook-form Git

Dynamic analysis and visualization of interactions between databases and programs in hybrid systems

Development of an analysis and comprehension tool for database manipulation logic behaviors within an information system.Study of the historical evolution of software systems at given times t-1 and t by capturing SQL and NoSQL traces. • [Demo](#)

Java Python Sprint Boot AspectJ JavaScript MongoDB SQL Antlr NoSql

Development of visualization tools for genomic data analysis

Developing a data extraction, cleaning, and transformation platform for visual analysis purposes, similar to tools like Sniplay. • [Demo](#)
